

College Credit for MSSC Courses

MSSC Courses have earned a college credit recommendation from the National College Credit Recommendation Service (NCCRS) for all modules in the Certified Production Technician (CPT) and Certified Logistics Technician (CLT) programs.

Courses	Credit	Courses	Credit
CPT Safety	3 hours	CPT Maintenance Awareness	3 hours
CPT Quality & Measurement	3 hours	CPT Green Production	2 hours
CPT Process & Production	3 hours	CLA & CLT (combined)	4 hours

Benefit for Students and Workers

- Over 1500 cooperating colleges and universities
- Up to 12 hours of credit for full-CPT and 4 hours for full-CLT
- Dual credit potential for high school students
- Applicable to all new candidates and to anyone who has earned an MSSC credential within the past five years
- Opportunity to earn industry-recognized, nationally portable credentials and college credit
- Opens doors for individuals who do not follow traditional education and career pathways
- Many employers reimburse tuition costs if courses lead to college credit or degrees

How to get Credit

Individuals who have earned an MSSC credential within the past five years can go to the NCCRS website (nationalccrs.org) and view the list of cooperating colleges and universities. While the recommendation does not guarantee credit will be given, participating schools will consider offering college credit hours.

Benefits for Training Providers

- Because MSSC Courses are based upon nationally validated industry standards, CPT and CLT are well suited to be the foundation of a manufacturing and/or logistics program or degree
- Courses have a proven track record of success in teaching the knowledge and skills needed by today's front-line worker
- Attract more students, including high school and non-traditional students who may not otherwise consider attending college
- Many recent federal funding opportunities include a requirement for industry-recognized credentials and/or college degrees – offering credit for MSSC Courses and credentials helps you meet both requirements
- Administrative costs for credit course are often much lower than non-credit courses
- Credit courses are eligible for both Pell Grant and GI Bill Funding

How to Participate

MSSC encourages all of its college and university customers to incorporate MSSC Courses and credentials into their for-credit offerings. Organizations interested in becoming an NCCRS Cooperating College or University should contact NCCRS directly (nationalccrs.org).

See our website for more details and contact information: www.msscusa.org/nccrs
