E-Learning

MSSC has partnered with Amatrol to develop online interactive learning units for the CPT training program. Currently there are 42 online units, each requiring about 2 hours to complete. See the **CPT e-Learning Video** for an introduction to the online learning program.

These online units are carefully aligned with MSSC Standards to help prepare students with a knowledge and understanding of its four Critical Work Functions: Safety, Quality Practices & Measurement, Production & Processes and Maintenance Awareness. The specific features and benefits of these online units include:

- Increases computer skills
- Develops machine operation skills through computer-based simulations
- Increases access through online delivery accessible anywhere there is an internet connection
- Provides individualized instruction capability
- Enables greater training capacity through virtual delivery options

Education and training institutions require adequate broadband to deliver MSSC's computer-based simulation training courses. IT departments at those institutions should check with MSSC prior to ordering Courses. Insufficient band-width may require further set-up activity which resulting in additional fees.

NOTE: MSSC Courses were developed in strict adherence to the industry-recognized, nationally validated standards upon which the Certified Production Technician (CPT) is based. These Courses, developed and delivered by Amatrol, have a proven track record of success in teaching the knowledge and skills identified in the national standards. The success rates for students taking MSSC Courses are nine points higher than those who do not (81% vs. 72%, respectively). MSSC Courses are highly interactive and utilize state-of-the-art, computer-based, simulation e-learning technologies and are delivered by MSSC-Authorized Instructors. MSSC does not authorize, review or endorse any other courses or curricula, and MSSC does not accept responsibility for the quality or effectiveness of courses other than MSSC Courses. MSSC does not require that individuals take MSSC Courses or any other MSSC-related courses before taking an MSSC Assessment.
